SHUBHAM RAJ

SKILLSET

Front-End: JavaScript, React JS, Redux, HTML5, CSS3, Bootstrap, JSX, Next JS, SASS
Back-End: Node JS, Mongo DB
Tools & Methods (Used**):** Git, Heroku, Netlify, Firebase, AWS, Google Cloud, Azure, CDCI, Digital Ocean, GitHub, Gitlab, Zira, Atlassian Bitbucket, Jenkins

EXPERIENCE

SENIOUR ASSOCIATE CONSULTANT ***(Infosys, Bangalore)*** ***Dec 2024 – Present***

- Collaborate with Product Owners (POs) and Business Analysts (BAs) to provide accurate effort estimates for new features and enhancements, ensuring realistic sprint planning.
- Conduct detailed pull request (PR) reviews to maintain high code quality, enforce coding standards, and share best practices with the team.
- Develop proof-of-concept (POC) components to validate technical approaches before full-scale implementation, reducing delivery risks.
- Configure and optimize CI/CD pipelines (Jenkins/GitHub Actions) to streamline build, test, and deployment processes for Citi applications.
- Design, build, and maintain reusable React.js components with advanced state management (Redux/Context API), ensuring performance, accessibility, and cross-browser compatibility.
- Coordinate with cross-functional teams to troubleshoot issues, implement solutions, and deliver high-quality features within agreed timelines.

CONSULTANT ***(Capgemini, Kolkata)*** *May 2021 – Dec 2024*

- **Client Engagement & Project Delivery**: Led frontend initiatives for Discover Bank and contributed to Abu Dhabi Bank projects, delivering high-performance applications in the Financial Services domain.
- **Feature Development**: Designed and implemented 50+ user-facing features using React.js, Hooks, Redux, TypeScript, Vite, and Material-UI; built reusable component libraries.
- **Performance Optimization**: Refactored 30+ components into Higher-Order Components (HOC) and improved load speed by 35% through API optimization and efficient state management.
- **Quality Assurance**: Introduced rigorous bug-fix processes, wrote unit tests using Jest and React Testing Library, and ensured cross-browser compatibility by testing and optimizing 140+ components.
- **Collaboration** & Agile Practices: Worked with backend, QA, design, and product teams across all project phases; participated in Agile ceremonies including backlog grooming, sprint planning, and retrospectives; conducted code reviews and enforced maintainable coding standards**.**

SOLUTION ENGINEER ***(Gammastack, Indore)*** *May 2020 – August 2020*

- **Application Development:** Built 3+ data-driven applications using React.js and Next.js with server-side rendering (SSR).
- **UI Components:** Created responsive, global UI components with Material-UI and custom styles.
- **API Integration:** Developed secure REST API integrations with authentication and data validation.
- **DevOps:** Deployed applications to AWS, Vercel, and Netlify; managed Webpack/Babel builds.
- **Testing:** Added Cypress and Jest coverage for critical features.

SOFTWARE ENGINEER ***(Nagravision India Pvt. Ltd., Bangalore)*** July 2018 – July 2019

- **Test Automation:** Authored 350+ JavaScript test cases in Jenkins, increasing coverage from 15% to 85%.
- **Cross-Browser Testing:** Performed UI automation and regression testing across devices.
- **Collaboration:** Worked closely with frontend and backend teams to align on testing strategies.
- **CI/CD:** Integrated automated tests into Jenkins build pipelines.
- **Documentation:** Prepared test plans, strategies, and execution reports.

EDUCATION QUALIFICATION

MTech (Data Engineering)
Indian Institute of Technology, Jodhpur (IITJ) *2024 -pursuing*

Microverse
Remote Full Stack Web Development Program *2019 -2020*

- Mastered algorithms, data structures, and full-stack development through 1300+ hours of JavaScript, React, and Redux projects. Proficient in remote pair-programming via GitHub and Git flow, collaborating effectively in daily standups with global teams across the community.

Bhilai Institute of Technology
Bachelor of Engineering with Computer Science Engineering *2014-2018*

- Followed my passion for Software Development and completed Bachelor Engineering in Computer Science & Engineering.

CERTIFICATION

- Salesforce Certified JavaScript Developer
- MongoDB Basics from MongoDB University
- Foundation Level Certificate in Software Testing from ISTQB.
