SKILLSET

Front-End: JavaScript, React JS, Redux, HTML5, CSS3, Bootstrap, JSX, Next JS, SASS

Back-End: Node JS, Mongo DB

Tools & Methods (Used): Git, Heroku, Netlify, Firebase, AWS, Google Cloud, Azure, CDCI, Digital Ocean, GitHub, Gitlab, Zira, Atlassian Bitbucket, Jenkins

EXPERIENCE

CONSULTANT (Capgemini, Kolkata)

June 2022 – Present

- **Client Engagement:** Spearheaded frontend development initiatives for Discover Bank, driving the delivery of high-performance applications in the Financial Services domain, resulting in enhanced client engagement and satisfaction.
- **Feature Development:** Designed and developed 50+ user-facing features using React.js, enhancing the customer experience and building reusable front-end libraries. Features using Redux, and Vite.
- **Performance Optimization:** Collaborated with developers to implement RESTful APIs, boosting loading speed by 35%. Refactored 30+ components to use Higher-Order Components (HOC).
- **Cross-Browser Compatibility:** Tested and optimized 140+ React components for enhanced performance across multiple devices and browsers.
- **Agile Methodologies:** Participated in Agile sprints, improving team productivity and outcomes.

ASSOCIATE CONSULTANT (Capgemini, Kolkata)

May 2021 – May 2022

- **Project Excellence:** Played a pivotal role in the Abu Dhabi Bank project, developing responsive and scalable UI components using React.js, TypeScript, and advanced libraries like Material-UI and Formik, contributing to successful project delivery.
- **Quality Assurance Leadership:** Implemented rigorous bug-fixing and test case writing processes, introducing innovative ideas and proofs of concept that significantly enhanced application functionality and reliability.
- **Cross-Functional Collaboration:** Fostered seamless teamwork across backend, QA, design, and product teams throughout all project phases, ensuring alignment and achieving high standards of delivery excellence.
- **Code Quality Assurance:** Led comprehensive code reviews and implemented best practices, ensuring superior code quality, maintainability, and adherence to project objectives.

SOLUTION ENGINEER (Gammastack, Indore)

May 2020 – August 2020

- **Application Development:** Developed 3+ frontend applications for data analysis, ensuring secure interactions with multiple APIs.
- **Technology Stack:** Utilized modern technologies including React.js, Next.js, Material-UI, Formik, and Yup to build responsive, global UI components.
- **Feature Implementation:** Developed and implemented a standalone data extraction agent, enhancing the capabilities of a financial product.
- **Collaboration:** Worked closely with project managers, developers, and QA teams to address challenges, optimize testing methods, and apply best practices.

SOFTWARE DEVELOPER (Minusoft India Pvt. Ltd., Jharkhand)

August 2019 – May 2020

- **Frontend Development:** Built applications across various platforms using React and Redux, contributing significantly to web-based software development.
- **Framework Expertise:** Gained hands-on expertise in Bootstrap and Foundation, enhancing user interfaces with responsive design.
- **Continuous Improvement:** Actively involved in the enhancement and operation of web-based software, fostering a culture of continuous improvement.

SOFTWARE ENGINEER (Nagravision India Pvt. Ltd., Bangalore)

July 2018 – July 2019

- **Automated Testing:** Developed comprehensive testing strategies, increasing test coverage from 15% to 85% with 350+ JavaScript test cases in Jenkins.
- **Collaboration:** Partnered with frontend and backend teams to align testing and development strategies with client requirements.

EDUCATION

MTech (Data Engineering)

Indian Institute of Technology, Jodhpur (IITJ)

2023 -pursuing

Microverse

Remote Full Stack Web Development Program

2020 -2021

- Mastered algorithms, data structures, and full-stack development through 1300+ hours of JavaScript, React, and Redux projects. Proficient in remote pair-programming via GitHub and Git flow, collaborating effectively in daily standups with global teams. Implemented CI/CD pipelines using Jenkins for streamlined testing and deployment processes.

Bhilai Institute of Technology

Bachelor of Engineering with Computer Science Engineering

2014-2018

- Followed my passion for Software Development and completed Bachelor Engineering in Computer Science & Engineering.
